COURSE (SUBJECT) BOOK

Computer Skills

College Name	Education
Department Name	Mathematics
Academic Year	2026 – 2027
Lecturer Name	Maher Ali Nawkhass - Bushra Najmaddin Abdulgaphur
Email	maher.nawkhass@su.edu.krd
Lecturers' Profile Link	https://staff.su.edu.krd/maher.nawkhass
Office Hours	Days & Times: 30 Hours
Year of Study	First
Level of Course	Level 1 / Undergraduate

1. Course Information:	
Course Title	Computer Skills
Course Code	S000001
Credit Hours (ECTS)	3
Semester	1st
Prerequisites	No

Theory	1 hour
Practical (if applicable)	2 hours

2. Introduction:

Incoming secondary school graduates are introduced to the fundamentals of computers, digital literacy, academic software tools, and cloud platforms needed for higher education in this foundational subject. Proficiency in document formatting, data management, visual presentations, and secure digital communication is essential for academic achievement in contemporary higher education, regardless of a student's program, scientific, medical, technical, humanistic, or social science.

Key ideas in computer architecture, operating systems, network principles, data privacy, and digital ethics are established by the theoretical component. The practical application of structured academic paper preparation, quantitative analysis and graphing, seminar slide creation, and university LMS portal navigation is the main focus of the practical laboratory sessions.

3. Aim of the Course:

1. Give students in-depth understanding of why computers are essential components in business, education and society.
2. Introduce the fundamentals of computing devices and reinforce computer vocabulary, particularly with respect to personal use of computer hardware and software, the Internet, networking and mobile computing.
3. Provide hands-on use of Microsoft Office applications Word, Excel, Access and PowerPoint. Completion of the assignments will result in MS Office applications knowledge and skills.
4. Provide foundational or "computer literacy" curriculum that prepares students for life-long learning of computer concepts and skills
5. Recognize when to use each of the Microsoft Office programs to create professional and academic documents.
6. Use Microsoft Office programs to create personal, academic and business documents following current professional and/or industry standards.

   Learning and studying software or programing as per department requirements.

4. Objectives: *(The following is provided as an example only). The objectives are based on the subject specifications.*

1. Develop the fundamental digital skills needed for administrative and research duties at Salahaddin University-Erbil.

2. Offer hands-on instruction in the creation, editing, and formatting of technical papers, research reports, and

academic writings.

3. Give students a foundational understanding of data management, spreadsheet formula computation, and visualization.

4. Teach students how to use cloud collaboration tools, electronic library repositories, and university Digital learning management systems (LMS).

5. Course Learning Outcomes: (The following is provided as an example only). The CLOs are based on the Course specifications.

Category	CLOs	course Learning Outcome
Knowledge	CLO1	Define AI and explain its main concepts, historical development, and evolution in accessible, non-technical language.
Intellectual Skills	CLO2	Acquire critical evaluation skills to analyze social, ethical, and economic impacts while identifying biases and inaccuracies.
Practical Skills	CLO3	Explore and use popular AI tools and platforms to support academic learning, research, and creative expression.
Transferable Skills	CLO4	Develop adaptable digital literacy by effectively prompting and integrating AI tools into academic research and professional career paths. Enhance problem-solving and creative capabilities through hands-on practice with modern applications, while cultivating responsible data management and privacy habits across diverse disciplines.

6. Reading and Learning Resources:

Essential Textbooks	• McCarthy, J. (2007). What is artificial intelligence? Stanford University. • PwC. (2025). Value in motion: Assessing AI's economic potential through 2035. PwC Global.
Recommended Reading	• Foundational & Accessible Text: Artificial Intelligence: A Guide for Thinking Humans by Melanie Mitchell. • Societal & Ethical Focus: The Alignment Problem: Machine Learning and Human Values by Brian Christian.
Online Resources	• John McCarthy's foundational reference paper hosted by Stanford University, providing basic definitions and principles of AI. • Author Melanie Mitchell's resource site featuring commentary, table of contents, and audio excerpts for Artificial Intelligence: A Guide for

	Thinking Humans.

7. Main Topics of the Course:

Week	Topic
1	Introduction to Course Book
2	Introduction to the University Learning Management System (LMS): Darwazai Zanko
3	Computer System Overview
4	Operating Systems & Storage
5	Word Processing Basics
6	Academic Document Structure
7	Tables, Captions & References
8	Spreadsheet Fundamentals
9	Mathematical & Statistical Formulas
10	Logical Operations & Data Tools
11	Data Visualization, Chart types (Bar, Line, Pie)
12	Presentation Fundamentals
13	Multimedia & Presentation Tools
14	Networks & Internet Technologie
15	Final Examination

8. Assessment Strategy: The breakdown of assessment marks is based on the subject specifications, the University's QA regulations, and the type of study (Bologna, Yearly, or Seasonal).

Assessment	Weight
Class Participation	3%

Assignment	**5%**
Report	**4%**
Quiz	**5%**
Mid-Term Examination	**20%**
Project / Presentation	**3%**
Final Examination	**60%**
Total	**100%**

9. Student Workload Breakdown

Example: If the Course is worth 3 ECTS, the total student workload is 81 hours, comprising 42 hours of class attendance and 39 hours of self-study.

Academic Year: 2026-2027		**Semester:** Fall	
ECTS: 3		3*27 = 81 Total number of credit hours	
Prerequisite: Yes / No			
Type	**No. of Activities**	**Hours (Duration) per Activity**	**Total**
Theoretical Lectures	14 weeks	1 hr	**14**
Practical Laboratory	14 weeks	2 hrs	**28**
Continuous Classwork & Discussions	4	2 hrs	**8**
Quizzes & Short Tests	2	2 hrs	**4**
Academic Report / Project	1	8 hrs	**8**
Seminar / Presentation	1	3 hrs	**3**
Midterm Examinations	1	6 hrs	**6**
Final Examinations	1	10 hrs	**10**
Theoretical Lectures	14 weeks	1 hr	**14**
Practical Laboratory	14 weeks	2 hrs	**28**
Total			**81hr**

10. Learning Outcome Mapping: Example of Computer Network Course with 10 Learning Outcomes (LOs)

Topics	Assessment	Week	CLO(s)
Introduction to Computer – Definition – Uses – Computer Skills.	Class Participation	1	CLO1, CLO2, CLO3
Computer System Components – Hardware vs Software.	Assignment	2	CLO3, CLO5
Computer Generations – History of Computers.	Report	3	CLO2, CLO4, CLO5
Types of Computers – Personal Computer Categories.	Quiz	4	CLO2, CLO5
Input Devices – Examples and Uses, Output Devices – Examples and Uses. CPU – Components – ALU & CU – Clock Speed.	Project	5	CLO4, CLO8, CLO9
Memory & Storage Devices – RAM vs ROM – Measurement Units.	Presentation	6	CLO5, CLO9
Computer Viruses, Short cut key.	Class Participation	7	CLO2, CLO5
Microsoft Word Basics – Program Screen – Starting Word 2010, Word Text Editing – Formatting Characters & Paragraphs.	Assignment	8	CLO4, CLO8
Page Layout – Lists – Borders – Tables in Word.	Practical	9	CLO6, CLO7, CLO8, CLO10
PowerPoint Basics – Program Screen – Slides Management.	Group Discussion	10	CLO1, CLO4, CLO9
Inserting & Formatting Objects – WordArt, Images, SmartArt.	Seminar	11	CLO7, CLO8, CLO9
Page Layout – Lists – Borders – Tables in ppt.	Quiz	12	CLO8– CLO10
	Class Participation	13	CLO1– CLO10
		14	CLO1– CLO10
		15	CLO1– CLO10

11. Sample Examination Paper:

Q1: What is meaning of the following abbreviations. **(6 Marks)**

PC	(Sample)	Personal Computer
1	CPU	

2	ROM	
3	DVD-RW	
4	CD	
5	GUI	
6	VDUs	

Q2: Answer the following: (6 Marks)

1. Mentions th memory units.
2. What is type of main memory?

Q3: Defines the following (6 Marks)

1. ROM
2. Software

Note: This course book is subject to approval by the Department Council (Scientific Committee) and must be signed by the Head of the Department.
